

# Randek AB

Randek AB is a sustainable leader in the timber industry with over 60 years of experience. We develop innovative solutions for automated construction processes and prefabricated components. By integrating sustainability, we contribute to a more resource-efficient and climate-smart industry. Learn more at [www.randek.com](http://www.randek.com)

## Purpose and goals

Randek aims to actively reduce its environmental impact. Through our annual climate report, we gain a clear overview of our emissions and impact, which allows us to identify areas where we can make a real difference. Our climate strategy focuses on energy usage, waste management, emissions, and social responsibility. We have invested in energy-efficient equipment to reduce energy consumption in our production. We have set a goal to reduce landfill waste and carbon emissions through optimized transportation, as well as by increasing the use of hybrid and electric vehicles. At the same time, we are proud to allocate 1% of our profits to sustainability and social justice projects.

## Actions 2024

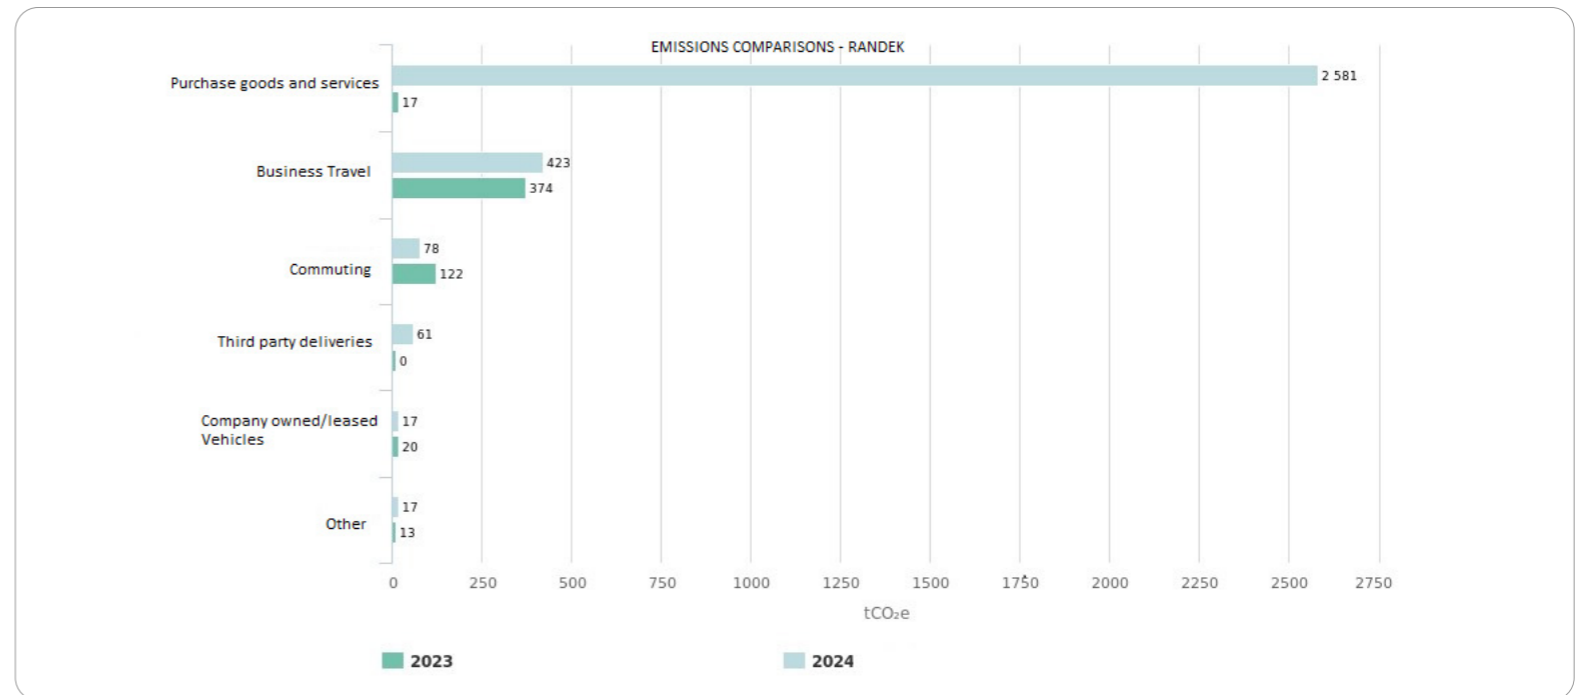

In 2024, Randek has taken important steps to reduce its climate footprint and actively contribute to a sustainable future. Randek has achieved ISO 14001 certification, providing a structured strategy for enhancing sustainability. Additionally, Randek has introduced annual environmental training to ensure sustainability efforts are integrated throughout the organization. Notably, many of our employees are now commuting in electric and hybrid cars.

**14 %**

The most significant difference between 2023 and 2024 is the more comprehensive mapping of Scope 3 emissions, which now includes steel purchases for completed sales projects and upstream transportation.

## Analysis, follow-up and comments

Randek's results for 2024 show both progress and challenges. Total emissions have increased partly due to the inclusion of purchased steel material and upstream transportation in the reporting 2024. Emissions from Scope 1, which include the company's own activities, have decreased slightly, mainly due to the transition to electric and hybrid vehicles. Emissions from Scope 2, electricity consumption, have remained at a low level. Randek has also succeeded in reducing the climate impact of commuting, but the increase in business travel requires continued attention. The new insights into Scope 3 provide a better overview of the company's total climate impact and enable focused actions moving forward. Randek is on the right track toward its sustainability goals.

## More comprehensive mapping

The largest difference between 2023 and 2024 is due to a more comprehensive mapping of Scope 3 emissions, including steel purchases and upstream transportation.

Emissions CO <sub>2</sub> e (tons)	2023	2024
<b>Scope 1</b>	<b>18,5</b>	<b>18,7</b>
Company-owned and leased vehicles	15,2	13,2
Equipment and machinery	3,4	5,5
<b>Scope 2 (market-based emissions)</b>	<b>0,2</b>	<b>0,2</b>
Electricity	0,2	0,2
<b>Scope 3</b>	<b>526,7</b>	<b>3157</b>
Purchased goods and services	16,6	2580,8
Of which are Paper and printed matter	0,1	0,04
Of which are IT goods	16,4	20,1
Of which are purchase of steel (Material)		2560,7
Upstream emissions for fuel and energy-related activities	14	13
Upstream emissions for transportation and distribution		62,8
Waste	0,2	0,01
Business Trips	374,0	423,0
Commuting	121,9	77,6
Water	0,1	0,1
<b>Total emissions (market-based emissions)</b>	<b>545,5</b>	<b>3176</b>
<b>Biogenic emissions (tCO<sub>2</sub>e)</b>	<b>5,2</b>	<b>2,7</b>
<b>Location-based emissions scope 2 (tCO<sub>2</sub>e)</b>	<b>5</b>	<b>6</b>
